

ELECTRONIC CONTROL PANEL

NGPANEL ELECTRONIC CONTROL PANEL

TECHNICAL DATA Single-phase power: 1 x 230 VAC 50/60 Hz Three-phase power: 3 x 400 VAC - 3 x 575 VAC 50/60 Hz Maximum operating current: 1 x 29 A (1 x 230 VAC - 1 x 110 VAC) 1 x 12 A (3 x 400 VAC - 3 x 230 VAC) 2 x 12 A (1 x 230 VAC - 1 x 110 VAC) 2 x 12 A (3 x 400 VAC - 3 x 230 VAC) 2 x 20 A (1 x 230 VAC - 1 x 110 VAC) 1 x 8 A (3 x 575 VAC) 2 x 8 A (3 x 575 VAC) IP protection: IP55 and NEMA 3R Room temperature: -10°C +50°C Starting capacitor: supplied as an additional kit Maximum altitude: 1000 m. above sea level Certification: CE, UL/CSA

Control panel for the control and protection of single-phase or three-phase pumps in residential, commercial and livestock environments, used for removing sewage and drainage water or filling (transferring) water into tanks.

The control panel protects the pumps and allows them to operate in automatic mode when connected to floats, level probes, or depth probes.

The graphic display allows for easy use thanks to the multilingual configuration wizard. It is possible to select the operating mode (filling or emptying) and the types of controls (floats, level probes or depth probes), or scroll through the alarm history.

The control panel features a self-extinguishing thermoplastic enclosure with IP55 and NEMA 3R protection class.

Various accessories may be combined with the control panel, such as controls (floats, level probes, depth probe) and capacitors for single-phase pumps, to be installed inside the panel itself.

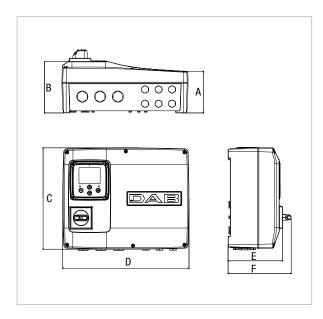

Inside the control panel are: connection terminals for single-phase or three-phase power supply (L1, L2, L3); connection through single-phase or threephase pump meters (U-V-W); connection terminals for thermal protection; three flashing light or siren alarm signalling output contacts.

NgPanel features Bluetooth and Wi-Fi connectivity, and can be managed using the DConnect app. When there is no Wi-Fi connection, it is possible to use the DAB Wi-Fi Modem Kit, connecting it directly to the dedicated USB port inside the control panel.

The alarms displayed include: pump overheating or overloading, water leaks into the oil chamber, breakdowns or malfunctioning, excessive number of restarts. There is the possibility of calculating the amount of water pumped out of the collection tank.

DCONNECT DIGITAL SERVICES REMOTE CONTROL FOR ELECTRONIC RESIDENTIAL AND COMMERCIAL SYSTEMS

The D.Connect service offers simple and intuitive remote control of your installation, without the need of a server or specialist personnel. **With D.Connect, you can remotely manage your installations as if you were right in front of them.** Thanks to the system operation charts, you will also be able to optimise operation. You will also receive prompt notifications of any system faults.

THE SERVICE ALLOWS TO:

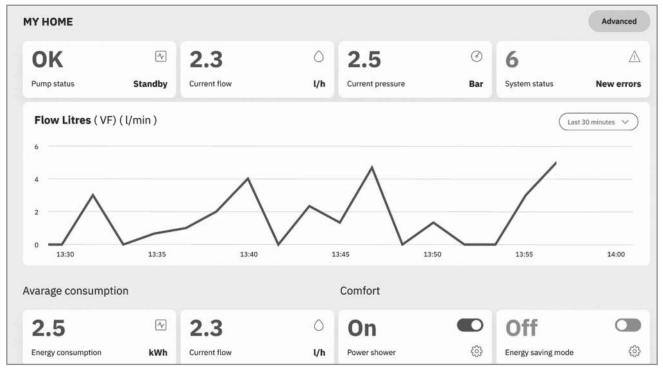

EASILY MONITOR YOUR SYSTEMS

The installations with green status are OK, while the orange ones need attention, and the red ones are experiencing problems.

TAKE ANY NECESSARY ACTIONS AS IF YOU WERE RIGHT IN THE PUMP ROOM

Using the internet site or the APPs, you will be able to easily and quickly control your systems.

REMOTE ALARMS

In case of alarm, the D.Connect service will promptly send you a notification, so that you can check what is happening and organise a visit to the system before the issue becomes an emergency for your customer.

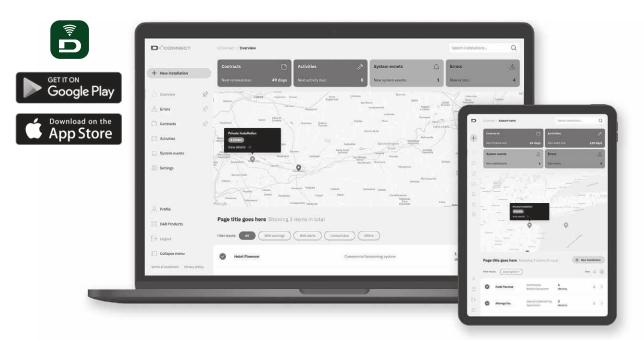

DCONNECT DIGITAL SERVICES REMOTE CONTROL FOR ELECTRONIC RESIDENTIAL AND COMMERCIAL SYSTEMS

In order to use the D.Connect service, registration and connected products are required.

Connect to the website: https://dconnect.dabpumps.com using Internet Browsers such as Microsoft Edge or Google Chrome.

The Android and iOS D.Connect APPs can be downloaded from the relevant Stores:

WHAT PRODUCTS CAN YOU MANAGE USING THE D.CONNECT SERVICE?

NgDrive, NgPanel, MCE/P, MCE/C, ADAC, Active driver Plus, Ebox, Evoplus, Esybox, Esybox mini, Esybox Diver, Dtron 3, Esybox Max.

For more information visit: www.internetofpumps.com

Simple and intuitive digital service for remote monitoring of DAB products: it allows you to find all the information you need, supervise the operation of the systems, or change the setting parameters.

APP DAB LIVE!

It makes easier for end users to supervise domestic systems in order to optimize consumption and maximize comfort, also thanks to Power Shower and Sleep Mode functions.

USER INTERFACE AND PROTOCOLS

NGPANEL

DAB SMART SYSTEM

Used in conjunction with **DAB Virtual Cockpit** and **DConnect**, it becames a very smart sysment, with an intuitive and effective user experience.

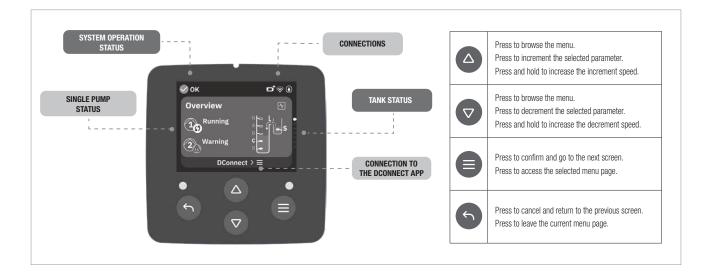

Setting up the system is extremely quick thanks to the wizard: it takes 5 steps and 5 minutes to completely set up the plants.

USER INTERFACE

Employing a consistent vertical scroll logic, the homepage also provides quick access to menus for the individual sections. On a single clear, user-friendly screen, **DAB Virtual Cockpit** summarizes all the key information to be monitored in order for the system controlled with **NgPanel** to work at its best.

The buttons are cross-arranged for easy interaction and the menu navigation symbols are intuitive.

PROTOCOLLI DI RETE

*	Bluetooth: standard di trasmissione dati wireless, a corto raggio (punto a punto). È possibile collegare dispositivi come telefoni cellulari, personal computer, tablet. Collegamento tramite smartphone, direttamente a NgPanel in caso di configurazione da telefono tramite app DConnect.
(((•	WI-FI: short-range wireless data transmission standard (point-to-point). You can connect devices such as mobile phones, personal computers, tablets. Connection via smartphone, directly to NgPanel in case of configuration from smartphone via DConnect app.

ACCESSORIES
